1. Introduction

MotoNotepad is a multifunctional application for motorcyclists that helps track maintenance, expenses, record routes, store notes, and plan future achievements. The app also has Apple Watch integration for convenient route tracking and workout monitoring.

2. Main App Screens

2.1. Main

The main screen contains useful articles and buttons to access the Settings and Motorcycle List screens.

Screen Features:

- View useful articles and news
- Access app settings
- Manage motorcycle list

In the motorcycle list section, you can add multiple motorcycles and keep separate records for each one.

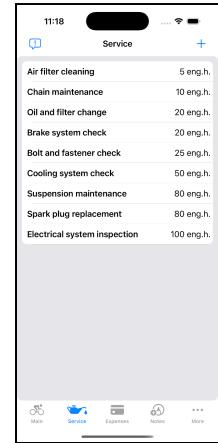

2.2. Service

A section for tracking motorcycle service maintenance.

Screen Features:

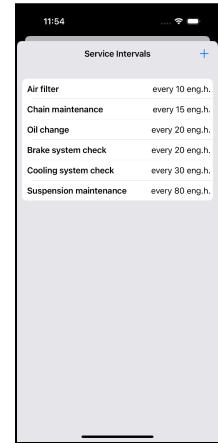

- Track completed service work
- Add new service records
- Access the "Service Intervals" screen

The section includes a button to access the "Service Intervals" screen, where you can create a reminder for your motorcycle's maintenance schedule.

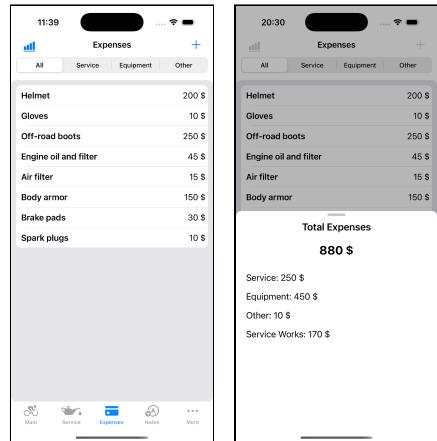

Service Intervals Screen

This screen allows you to create and configure a maintenance schedule for your motorcycle.

2.3. Expenses

A screen for tracking motorcycle expenses with category filters.

Screen Features:

- Add new expenses
- Filter expenses by category (Service, Equipment, Other)
- View "Total Expenses" statistics

The section includes a button to open the "Total Expenses" statistics, where you can see the total amount of expenses by category.

2.4. Tracker

A section for recording routes and tracks.

Screen Features:

- Record new routes
- View saved routes
- Import and export routes

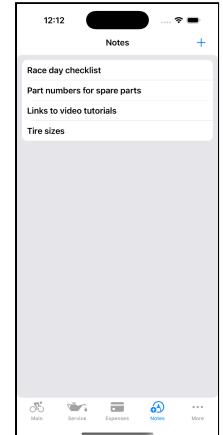

In the saved routes section, you can load your saved route, share it with friends, or add someone else's route.

Map Features:

- During recording, the map scales to fit the track size, allowing you to see the entire track
- The location button shows your current location but allows you to freely move the map
- The compass button rotates the map in the direction of travel, which is useful when navigating along a saved track
- The beginning of the track is marked in green for better orientation

2.5. Notes

A section for saving useful notes about your motorcycle.

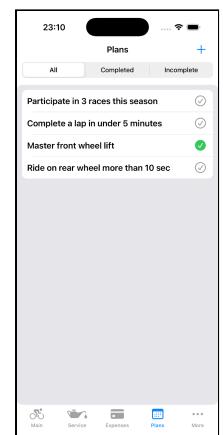

Screen Features:

- Create and edit notes
- Save part numbers
- Store links to manuals or useful articles
- Create lists of items and documents for training and competitions

Important: In "Notes," you can store links to manuals and instructions that you can save in your cloud storage (Yandex and Google Drive).

2.6. Plans

A section for creating a list of plans and future achievements.

Screen Features:

- Create a list of plans and goals
- Mark completed items
- Track achievement progress

In this section, you can create a list of plans and your future achievements and mark what has been completed and what is still pending.

2.7. Catalog

A catalog of parts, equipment, and consumables for motorcycles.

Screen Features:

- Browse the parts catalog
- Search the catalog
- Filter by categories

3. Additional Features

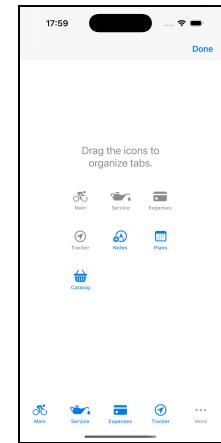

3.1. Tab Order Customization

The app allows you to customize the order of tabs in the bottom navigation bar for more convenient use.

How to customize tab order:

1. Go to the "More" section in the bottom navigation bar
2. Tap the "Edit" button
3. Drag the section icons in your preferred order
4. Tap "Done" to save the changes

Tip: Place your most frequently used sections at the beginning of the panel for quick access.

3.2. Settings

In Settings, you can change the currency for expense tracking and the units of measurement for mileage.

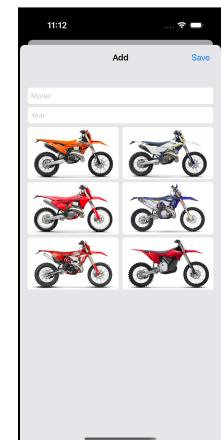

Available Settings:

- Currency: dollar (\$), ruble (₽), Belarusian ruble (Br), euro (€), tenge (₸)
- Mileage units: kilometers (km) or engine hours (eng.h.)

The selected settings will be applied to all sections of the app where the corresponding units of measurement are used.

3.3. Motorcycle Management

The app allows you to add multiple motorcycles and keep separate records for each one.

Motorcycle Management Features:

- Add a new motorcycle
- Select the active motorcycle
- Delete a motorcycle

All data (service, expenses, notes, etc.) is stored separately for each motorcycle, allowing you to keep complete records for multiple vehicles.

4. Apple Watch App

MotoNotepad has an Apple Watch extension that allows you to record routes, follow saved routes, track your heart rate, and sync metrics with the Health app for complete analysis of your workouts and physical activity.

Important: For the tracker to work, the iPhone app must be running in the background with the Tracker section open. This improves GPS accuracy and saves watch battery life.

4.1. Main Screen

The main screen of the Apple Watch app displays information about the current track and provides access to the main functions.

Screen Elements:

- Time and distance of the current track
- "Map" button to access the map
- "Saved" button to view saved tracks
- "Start/Stop" button to start and stop track recording
- Heart rate indicator (during active workout)

4.2. Map

The map screen on Apple Watch allows you to view the current or saved track.

Map Screen Features:

- Display the current track
- Zoom the map using the Digital Crown
- Location button to show your current position
- Compass button to rotate the map in the direction of travel

Important: The beginning of the track is marked in green for better orientation.

4.3. Saved Tracks

The saved tracks screen on Apple Watch allows you to view previously recorded routes.

Saved Tracks Screen Features:

- List of saved tracks
- Information about the date, distance, and time of each track
- Ability to open a track on the map

4.4. Health app Integration

The Apple Watch app integrates with Health app to track workouts and collect health data.

Integration Features:

- Heart rate monitoring during workouts
- Calorie burn calculation
- Recording workouts in the Health app
- Data synchronization between Apple Watch and iPhone

5. Conclusion

MotoNotepad provides a wide range of tools for motorcyclists, helping to track maintenance, expenses, record routes, store notes, and plan future achievements. The Apple Watch integration extends the app's capabilities, allowing you to record routes and track workouts right from your wrist.

We hope this guide helps you quickly master all the features of the app and make your use of MotoNotepad as efficient and convenient as possible.

Enjoy using the app!
